

Elevate Your Cyber Security Awareness Month Program

From Risk to Resilience

Take your Cyber Security Awareness Month activity further with two customer-only solutions designed to make your campaign more relevant, practical and easier to activate.

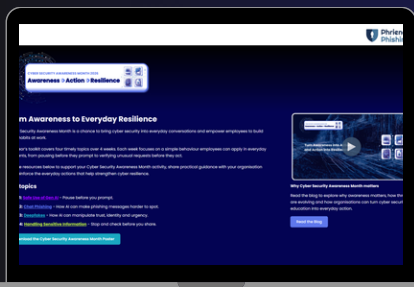

With support from our learning, engagement and cyber resilience specialists, choose from a branded campaign toolkit through our Cyber Resilience Program and a light customisation of the Safe Use of GenAI course with an attachable policy template to support safer AI use at work.

Cyber Resilience Program: Campaign Toolkit

Branded Cyber Security Awareness Month toolkit with customised tipsheets, blogs, campaign materials and a learner page to host your content and delivered by 5 business days.

Includes an implementation guide and ready-to-use email templates to help you launch quickly and keep the campaign consistent throughout October.

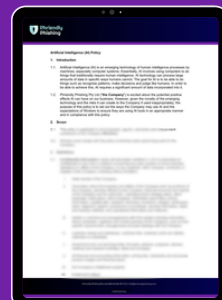

LITE Customised Course: Safe Use of GenAI

- Branding (company logo, brand colour palette, brand font)
- Additional content: Safe Use of GenAI Policy to attach directly to the course to help reinforce your organisation's internal guidance.

Note: Does not include changes to animation or professional Voice Over
