

Deckhand Explorer

What if you could describe the report you need and get results instantly?

Deckhand Explorer is an AI Assistant that helps admins ask complex, real-world questions and returns report-ready outputs, including cross-cutting combinations of training, simulation, organisational, and outcome data. It helps you analyse results, understand learner behaviour and answer complex data questions faster, so you can make more informed decisions and act.

- **Insights on demand. No digging. No guesswork.**
- **Faster answer and instant clarity from complex data.**
- **Self-serve insight for every admin.**
- **Prove your impact with measurable risk reduction**
- **Human risk intelligence that drives action and impact.**
- **Empowering leaders through data and insights.**

What Deckhand enables for admins:

Here's what Deckhand can help you with – all these data reporting & analysis queries

- **Phishing Simulation Performance** – Click-through rates, clicks, delivered emails, trends, etc.
- **Training & Learning** – Completion rates, pass/fail/incomplete status, course and block names, etc
- **Learner Behaviour** – Segmentation, learner levels, questionnaires, etc.
- **Reporting & Dashboards** – Executive summaries, date-range filtering, comparative insights, etc.
- **Learner Information** – Department, segment, job title, join date, etc.
